

Ivane Javakishvili Tbilisi State University

Faculty of Medicine

Dear students,

The Medicine Curriculum introduced by the Faculty of Medicine at TSU involves the system-based learning. Each of the learning blocks consists of four directions (anatomy, histology, physiology, biochemistry). We are interested how satisfied are you with the teaching process of modules. Your opinion is very important for us! Your comments will be considered in the developing process of medical program.

The survey is anonymous.

Thank you for your cooperation and your contribution to the development of the Medicine Program!

Use 5-point scale during the evaluation the courses: 1 is the lowest score, 5 is the maximum score.

Statement	1	2	3	4	5
The course load (reading literature and assignments) was proportional to the amount of credit					
Anatomy					
Histology					
Physiology					
Biochemistry					
The lecturer created a student-oriented learning environment					
Anatomy					
Histology					
Physiology					
Biochemistry					
The lecturer provided a consultation to students as needed					
Anatomy					
Histology					
Physiology					
Biochemistry					
The lecturer was using transparent evaluation criteria					
Anatomy					
Histology					
Physiology					
Biochemistry					
The final exam provides the ability for comprehensive assessment of the course					
Anatomy					
Histology					
Physiology					
Biochemistry					

Please evaluate your general satisfaction level according to the course					
Anatomy					
Histology					
Physiology					
Biochemistry					
Please evaluate your general satisfaction level according to the lecturer					
Anatomy					
Histology					
Physiology					
Biochemistry					
Do you think you have achieved the learning outcomes defined in the syllabus?					
Anatomy					
Histology					
Physiology					
Biochemistry					
Please, evaluate the effectiveness of integrated teaching					

What would you do differently if you were a lecturer of these courses?
