

Bring the clinic to the classroom

A safe and diverse virtual training hospital available 24/7 with 130+ virtual patients presented in peer-reviewed, inpatient, and outpatient cases.

Customizable Classrooms

Easily aligns and integrates with overall curriculum objectives while providing flexibility to assign and deliver the learning objectives.

Faculty Supporting Dashboard

- 'Class Management' shows active and completed classes.
- Case assignment aligns with classroom and curriculum objectives
- Individual reports with access to each student's personal dashboard
- Overall class progress monitoring
- Formative feedback and summative assessment

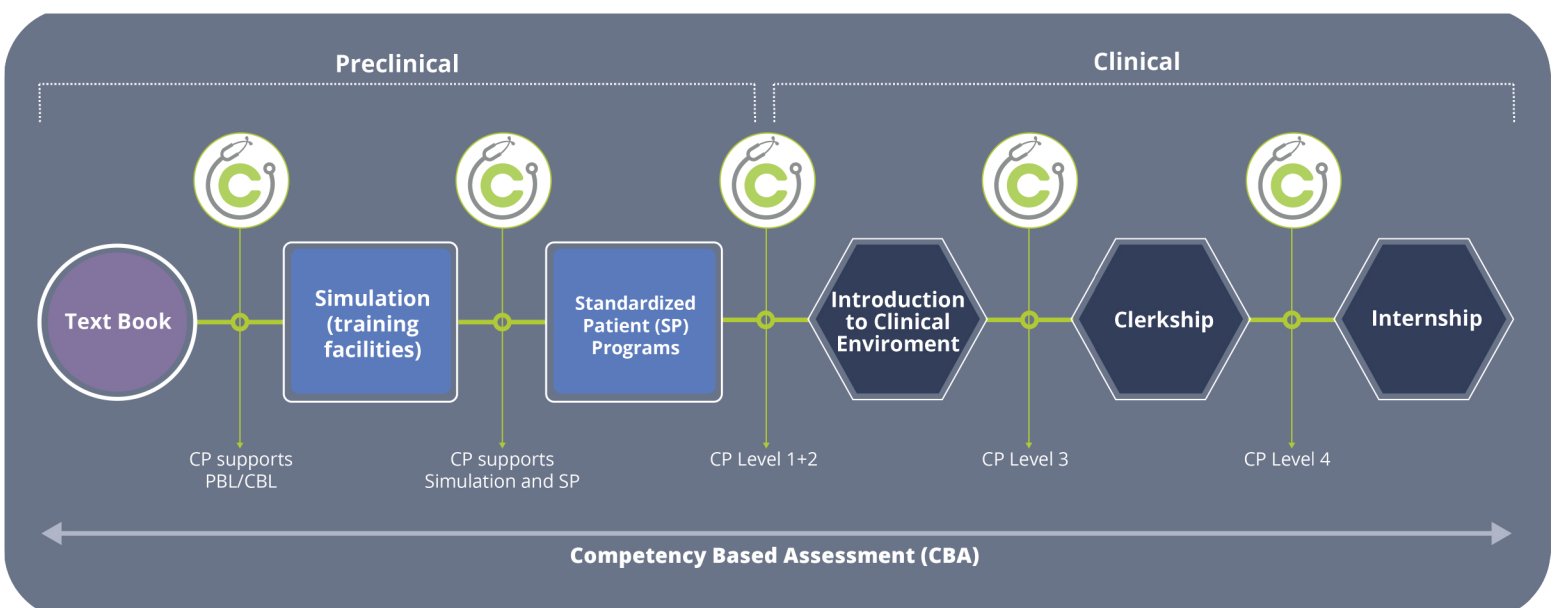

Student Assessment

- Efficiently monitor student progress using dashboard data and progress report
- Easily assess students' performance and optimize formative assessment using integrated intuitive feedback.

Supports the Learning Journey

- Stepwise learning progression helps align with curriculum objectives by setting classrooms at different levels.
- Scalable to all levels; from preclinical as a faculty-led Case-Based Learning (CBL) tool to pre-clerkship (levels 1+2), clerkship (level 3), and internship (level 4).
